GSMK CryptoPhone, first secure GSM mobile phone with open source code, launched at INTERSEC

Advanced German Technology (AGT), the world's top- ranking supplier and integrator of security products and solutions focusing on the Middle East, today announced the launch of the first encrypted GSM mobile phone using a published source platform, at INTERSEC Dubai, the international commercial security, police, fire, rescue and safety exposition, taking place from 25 -27 January 2004 at the Dubai World Trade Center.

AGT will be distributing the GSMK-manufactured CryptoPhone in the region, with the target markets for the product being those organisations and individuals whose communications are sensitive and
